

Chaffey's Area Lakes Association (CALA)

Who are we?

CALA is a non-profit, volunteer organization that serves the community of the Rideau Lakes in the vicinity of Chaffey's Lock(s).

Why do we exist?

We exist so that our successors will inherit a physically and emotionally healthy Rideau Lakes environment that is the same and better than that which has drawn us to this special place.

What do we contribute?

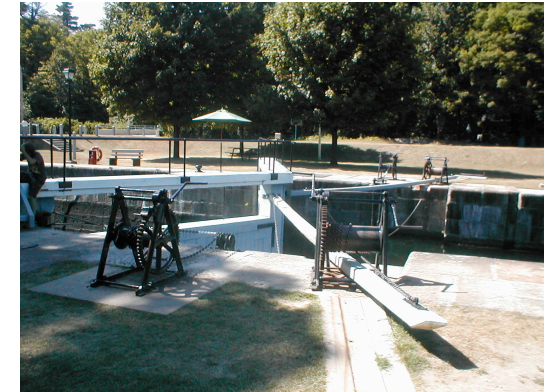

Our aim is to maximize the health of our lakes and their environs, maintaining them in the best possible state as wildlife sanctuary and recreational venue, while fully understanding and representing their diverse creatures and personalities.

To do this, we are dedicated to maximizing community knowledge and involvement by gathering and disseminating information relevant to the ongoing health of our lakes and lakesides, acting as educators, and providing liaison between government and our community. We strive for everyone in our community to be "mobilizable" around critical matters, without being intrusive.
